

# Elemaster: collaboration with the institutions

editorial staff 27 July 2023

**Elemaster** recently received a visit which expresses the collaboration between the company and local institutions. It **hosted the Lombardy Region’s Councillor for University, Research, Innovation, Alessandro Fermi, and the Lombardy Region’s Undersecretary for Autonomy, Mauro Piazza.** “This visit once again underlines the institutions’ desire to collaborate with the industrial realities of our territory – commented **Valentina Cogliati, President and CEO of Elemaster** –. It was an opportunity to retrace the decades-long history of our company, which this year celebrates its 45th anniversary, analysing the main technological developments and the investments made so far in innovation, to testify our ongoing desire to be close to the territory and to the world of technological innovation, represented by start-ups, universities and research institutes”.
