Enorme piacere e grande interesse per la visita fatta dal nostro Gruppo Giovani Imprenditori presso [Elemaster Group Electronic Technologies](#) a Lomagna.

Grazie!!

Elemaster was pleased to host young entrepreneurs from [CONFINDUSTRIA LECCO E SONDRIO](#), providing an opportunity to explore their future projects and ideas that will help drive the company's growth.

The event sparked great interest and highlighted Elemaster's core values: innovation and commitment to Customers. The presentation, given by Valentina Cogliati, Elemaster President and CEO, offered a deep insight into the company's operations and mission, and then special projects highlighted by Marco Arrigoni, Eletech System Engineer -R&D Group division- and technical leader for SKAO project, brought the audience into the world of cutting edge technology, not to mention Ecodesign and Value Engineering.

Finally, the subsequent tour gave the entrepreneurs a closer look at the advanced technologies driving Elemaster's activities in Lomagna.

The afternoon concluded with a refreshing gathering, where we celebrated past successes and looked forward to the exciting projects ahead. Elemaster remains a strong foundation for the growth of young people, from schools to entrepreneurs.
