IT Italy's **Elemaster Group Electronic Technologies** is collaborating with partners in five countries on SKA-Low's highly specialised digital processing system, which will make sense of the vast amounts of data the antennas collect! AUCNFRNLGB

"To ensure the accuracy of the analogue to digital conversion, we're sampling the incoming signal at an extremely high rate – 800 million times per second, across more than 262,000 channels," says **Marco Arrigoni**, Eletech SKA System Engineering Manager.
