The joint venture will operate through Syrma SGS Design and Manufacturing Private Limited, which will be renamed Syrma SGS Elemaster Private Limited.

Syrma SGS Technology Limited has signed a joint venture agreement with Italy-based Elemaster S.p.A Tecnologie Elettroniche to establish a manufacturing platform in India focused on railway, industrial and medical electronics.

The joint venture will operate through Syrma SGS Design and Manufacturing Private Limited, which will be renamed Syrma SGS Elemaster Private Limited. The facility will be located in the Bommasandra Industrial Area, Bengaluru, with an initial area of about 20,000 sq. ft. configured for SMT, THT and box-build assembly lines.

## Focus on high-reliability sectors

According to the companies, the partnership brings together Syrma's manufacturing scale and cost efficiency with Elemaster's design expertise and established relationships with European original equipment manufacturers (OEMs). The venture aims to create opportunities in high-reliability segments, expand business with global accounts and support India's role in the "Make in India" initiative.

Sandeep Tandon, Chairman, Syrma SGS Technology, said, "This joint venture represents a milestone in our journey to build a global high-reliability electronics platform out of India. By combining Syrma's execution with Elemaster's relationships with European OEMs, we are unlocking new growth vectors in rail, industrial and medical segments."

Satendra Singh, CEO, Syrma SGS Technology, said the JV will ensure “dedicated focus on high-reliability customers, efficient cost structures, and scalable operations” with a phased expansion plan and joint governance.

Valentina Cogliati, CEO, Elemaster Group, said: “India is a strategic market for our customers, and this joint venture with Syrma SGS gives us a reliable, competitive, and scalable base in the region.”
