Elemaster Group opened its new **Eletech** headquarters

On **26 September 2025**, the new **Eletech headquarters in Osnago (LC)** was officially inaugurated, marking an important milestone for the Elemaster Group.

Eletech, the lead company of the **International Design Centres (IDCs)** and **R&D division of the Group**, plays a central role in driving research, development and innovation in advanced electronics. The new headquarters has been designed to host **state-of-the-art laboratories** and **collaborative spaces**, enabling close interaction between research, engineering and production teams.

The facility also accommodates part of the Elemaster Mechatronic Department, reinforcing its strategic role in the design and industrialisation of complex mechatronic systems.

With this inauguration, the Elemaster Group strengthens its innovation hub, confirming its mission to combine **industrial know-how, certified quality and sustainability** in delivering high-reliability electronic solutions for the most demanding sectors.
