On 26th September, the new Eletech headquarters in Osnago was inaugurated, a milestone for the Elemaster Group. The day also marked 25 years of Eletech's activity, making the event a bridge between past achievements and future ambitions. Conceived as a true Innovation Hub, the facility connects research, development and industrialisation within a single ecosystem, reinforcing Eletech's role as a bridge between technology and industry.

The event brought together customers and partners from across Europe, colleagues, the innovation community and institutional authorities. The Elemaster Group thanks His Excellency Prefect Paolo Giuseppe Alfredo Ponta, the Mayor of Osnago Felice Rocca and his team, Giulio Sirtori, Director of **CONFINDUSTRIA LECCO E SONDRIO**, and the **Arma dei Carabinieri**, represented by Lieutenant Edonio Pecoraro and Marshal Ulisse Vincenzo, Deputy Commander of the Carabinieri of Merate.

With its new headquarters, Eletech strengthens **#ELEVO** and inaugurates the ELEVO HUB, a platform turning ideas into reliable, sustainable and market-ready solutions. More than a building, it is a collaborative environment where research, startups and industry can co-design, prototype and industrialise high-tech products, within a broader vision centred on innovation, sustainability and people.

During the event, Alberto Mattiello, international expert in technology and business innovation, delivered his keynote "The Next Play" on robotics, AI and industrial transformation. A round table followed with Paolo Denti (**Oversonic**), Maddalena Mugnosso (**ReWing**), Salvatore Majorana (Cysero / **Kilometro Rosso**) and Prof. Alessandra Pedrocchi (Milan Polytechnic – **Dipartimento di Elettronica, Informazione e Bioingegneria - Politecnico di Milano**). Guests also met startups already active within Eletech, including **Varionova srl**, Rewing, **ALTO Robotics**, Oversonic, **IMAGENSYS** and **Valuebiotech Srl**, confirming ELEVO's role as an open industrial hub.

"With Eletech, we want to offer our industrial partners direct access to expertise, infrastructure and engineering services that can accelerate the development of complex solutions. The ELEVO Innovation Hub represents the meeting point between research and industry to 'elevate' technologies and bring them to market," commented Marco Ferrari, Eletech CEO.

"The ELEVO Innovation Hub demonstrates that industrial evolution depends not only on technology, but also on new models of collaboration. We combine the value of relationships built over almost fifty years of history with the ability to effectively integrate innovation into products and processes, transforming every project into an opportunity to build the future together," concluded Ivo Boniolo, Head of Innovation HUB ELEVO.

Thank you, Marco, for your words and for the vision you bring to this project. The inauguration of the new Eletech headquarters and the launch of the ELEVO Innovation Hub represent a milestone for the Group, made possible thanks to the commitment of its people and the trust of partners and customers. Together, this shared ecosystem will continue to tran ... altro
