

Elemaster Group is pleased to announce the signing of a joint venture with Syrma SGS Technology Limited (<https://www.linkedin.com/company/syrma-technology/>) one of India's leading players in electronic design and manufacturing services.

The new company, Syrma SGS Elemaster Private Limited, will focus on the production of high-reliability electronic solutions for the railway, industrial and medical sectors. Based in Bengaluru, the 2,000 m² facility will be equipped with SMT, THT and box-build assembly lines, enabling a scalable and efficient response to global market needs.

This partnership represents an important milestone in Elemaster Group's international expansion strategy. By combining Elemaster's engineering and lifecycle expertise with Syrma SGS's large-scale execution capabilities, the joint venture will deliver competitive, certified, Made-in-India solutions to OEMs worldwide.

Valentina Cogliati, CEO of Elemaster Group, stated that India is a strategic market for the Group's customers, and this new company provides a solid and reliable base in the region. Giovanni Cogliati, CCO of the Group, underlined that the initiative strengthens an already successful collaboration, supporting both existing and new customers with strong investments in infrastructure and organizational capabilities.

Sandeep Tandon, Chairman of Syrma SGS Technology, highlighted how this agreement marks a key step in establishing India as a global hub for high-reliability electronics manufacturing, creating long-term value for customers and stakeholders.

With this new production hub, Elemaster strengthens its position as a strategic partner for high-reliability electronics manufacturing on a global scale.
