Syrma SGS Opens High-Reliability Electronics Facility in Bengaluru

Vaishali Chauhan • September 3, 2026 📖 3 minutes read

Syrma SGS Technology and Elemaster Group, leading players in electronics manufacturing and design ecosystem respectively in India and Europe, through their joint venture Syrma SGS Elemaster Private Limited inaugurated the new state-of-the-art high-reliability electronics manufacturing facility in Bengaluru, Karnataka.

electronics manufacturing capabilities in India and support customers across domestic and global markets, particularly in sectors where quality, reliability and stringent manufacturing standards are critical.

The launch was attended by Dr. Giandomenico Milano, Consul General of Italy in Bengaluru, along with leadership teams from Syrma SGS and Elemaster, customers and other key stakeholders. His presence at the inauguration underscored the growing importance of India–Italy [industrial \[https://www.bisinfotech.com/sima-ai-and-ark-electronics-partner-to-accelerate-intelligent-autonomous-drones/\]](https://www.bisinfotech.com/sima-ai-and-ark-electronics-partner-to-accelerate-intelligent-autonomous-drones/) and technology collaboration and the strategic relevance of the partnership between the two companies.

Located in the Bommasandra Industrial Area, the 20,000 sq. ft. facility is equipped with advanced Surface Mount Technology (SMT), Through-Hole Technology (THT) and box-build assembly lines. The facility has been established to address the growing demand for high-reliability electronics across sectors including railways and

venture to support global OEMs with high-quality manufacturing in India.

The joint venture brings together the complementary strengths of Syrma SGS and Elemaster. Syrma SGS contributes its scaled manufacturing capabilities, established supply-chain ecosystem and cost-efficient execution in India, while Elemaster brings decades of expertise in electronic design and manufacturing, engineering capabilities and strong relationships with European and global OEMs. Together, the companies aim to create a competitive platform for high-reliability electronics manufacturing and expand opportunities for global customers from India.

Valentina Cogliati, CEO, Elemaster S.p.a
said: *“We are delighted to inaugurate the Syrma SGS Elemaster facility in Bengaluru and take this strategic partnership into its next phase. India*

facility provides a strong foundation to support that opportunity. By combining Elemaster's engineering, technology and high-reliability manufacturing expertise with Syrma SGS's scale and strong presence in India, we can create an effective platform for serving both existing and new customers. We see significant long-term potential in India and are pleased to build this journey together with Syrma SGS."

andeep Tandon, Executive Chairman, Syrma SGS Technology Ltd., said: *"The inauguration of the Syrma SGS Elemaster facility is an important milestone in our vision of building India into a globally competitive hub for high-reliability electronics manufacturing. This partnership brings together Syrma SGS's manufacturing scale and execution capabilities with Elemaster's engineering expertise and strong relationships with global OEMs. As global supply chains evolve, India has a significant opportunity to move beyond scale and build capabilities in*

are creating a platform that can serve both Indian and international customers while contributing to the broader 'Make in India' ambition."

Jasbir Singh Gujral, Managing Director, Syrma SGS Technology Ltd., said: *"The new facility represents an important addition to our manufacturing footprint and strengthens our ability to serve customers in high-reliability segments. With SMT, THT and box-build capabilities under one roof, the facility provides an integrated platform to support complex electronics manufacturing requirements across railways, industrial and medical applications. We are particularly pleased with the progress of our partnership with Elemaster and the opportunity to combine our manufacturing strengths with its technology and engineering capabilities. We believe this will enable us to deliver greater value to customers while building globally relevant manufacturing capabilities from India."*

he inauguration programme featured institutional

Elemaster Group, followed by a tree plantation ceremony, the official unveiling of the facility and guided visits of the plant and shop floor.

The new facility marks another step in the evolution of India's electronics manufacturing ecosystem, particularly in high-reliability applications where engineering expertise, process control, quality and stringent manufacturing standards are essential. It is expected to provide the joint venture with a platform to serve both domestic and international customers and support the growing integration of India into global electronics supply chains.

The Syrma SGS Elemaster partnership also reinforces the broader India–Italy industrial relationship by bringing together complementary capabilities from the two countries. With the new facility, the joint venture aims to build an integrated platform spanning engineering, [manufacturing](https://www.bisinfotech.com/fujifilm-to-showcase-semiconductor-materials-expertise-at-semicon-india-2026/) [\[https://www.bisinfotech.com/fujifilm-to-showcase-semiconductor-materials-expertise-at-semicon-india-2026/\]](https://www.bisinfotech.com/fujifilm-to-showcase-semiconductor-materials-expertise-at-semicon-india-2026/) and high-reliability electronics, while creating globally competitive, Made-in-India solutions for customers across critical end-markets.

company. With over 45 years of expertise, Syrma SGS has been the preferred partner for customers seeking innovative and efficient solutions. The Company serves more than 270 customers across 20+ countries. It has a pan-India manufacturing footprint with facilities in Chennai, Bangalore, Manesar, Gurgaon, Pune, and Baddi, along with R&D centres in Chennai, Pune, Gurgaon, and Stuttgart, Germany.

The Company offers a comprehensive range of services, including Product Design, Assembly (PCBA & Box Build), Quick Prototyping, and Tester Development Services, positioning us as a catalyst for growth in the industry.

In addition to EMS, Syrma SGS also provides OEM solutions for RFID tags & inlays, high-frequency magnetic components, and electro-mechanicals. The Company's commitment to excellence is evident in the hundreds of millions of units delivered globally in the past decade, and the multi-decadal relationships with several global customers.
