Syrma SGS-Elemaster JV opens high-reliability electronics manufacturing facility in Bengaluru

The facility will address the growing demand for high-reliability electronics across sectors including railways and transportation, industrial electronics, energy and medical electronics, while enabling the joint venture to support global OEMs with high-quality manufacturing in India.

NEW DELHI: Syrma SGS Elmaster, a joint venture between homegrown Syrma SGS and Italian Elmaster, on Wednesday opened a new high-reliability electronics manufacturing facility in Bengaluru.

“The inauguration marks a significant milestone in the joint venture’s efforts to build advanced electronics manufacturing capabilities in India

and support customers across domestic and global markets,” they said in a joint statement.

Located in the Bommasandra Industrial Area, the 20,000 sq. ft. facility is equipped with advanced Surface Mount Technology (SMT), Through-Hole Technology (THT), and box-build assembly lines.

The facility will address the growing demand for high-reliability electronics across sectors including railways and transportation, industrial electronics, energy and medical electronics, while enabling the joint venture to support global OEMs with high-quality manufacturing in India.

Syrma SGS is contributing with its scaled manufacturing capabilities, established supply-chain ecosystem and cost-efficient execution in India, while Elemaster brings expertise in electronic design and manufacturing, engineering capabilities and strong relationships with European and global OEMs.

Together, the companies aim to create a competitive platform for high-reliability electronics manufacturing and expand opportunities for global customers from India.

“By combining Elemaster’s engineering, technology and high-reliability manufacturing expertise with Syrma SGS’s scale and strong presence in India, we can create an effective platform for serving both existing and new customers,” said Valentina Cogliati, CEO, Elemaster.

“We see significant long-term potential in India and are pleased to build this journey together with Syrma SGS,” Cogliati added.

“As global supply chains evolve, India has a significant opportunity to move beyond scale and build capabilities in areas where reliability, quality and engineering depth are critical,” said Sandeep Tandon, executive chairman, Syrma SGS Technology.

“Through this joint venture, we are creating a platform that can serve both Indian and international customers while contributing to the broader ‘Make in India’ ambition,” Tandon added.

“With SMT, THT and box-build capabilities under one roof, the facility provides an integrated platform to support complex electronics manufacturing requirements across railways, industrial and medical applications,” said Jasbir Singh Gujral, MD, Syrma SGS Technology.
