Syrma SGS Elemaster Opens High-Reliability Electronics Facility

 03 Sep 2026  2 Min Read  CW Team

SHARE    

Syrma SGS Technology and Elemaster Group have inaugurated a new high-reliability electronics manufacturing facility in Bengaluru through their joint venture, Syrma SGS Elemaster Private Limited.

The facility aims to strengthen India’s advanced electronics manufacturing capabilities and support customers across domestic and global markets, particularly in sectors requiring high quality, reliability and stringent manufacturing standards.

Located in the Bommasandra Industrial Area, the 20,000 sq. ft. facility is equipped with advanced Surface Mount Technology (SMT), Through-Hole Technology (THT) and box-build assembly lines. It will cater to growing demand for high-reliability electronics across railways and transportation, industrial electronics, energy and medical electronics sectors.

The joint venture combines Syrma SGS’s manufacturing scale, supply-chain ecosystem and execution capabilities in India with Elemaster’s expertise in electronic design, engineering and high-reliability manufacturing. The partnership aims to create a competitive platform for global OEMs seeking advanced electronics solutions from India.

Valentina Cogliati, CEO, Elemaster Group, said the facility marks a new phase in the strategic partnership and will support the company’s growing opportunities in India by combining engineering capabilities with Syrma SGS’s manufacturing strengths.

Sandeep Tandon, Executive Chairman, Syrma SGS Technology, said the facility represents a step towards building India as a globally competitive hub for high-reliability electronics manufacturing, enabling the company to serve both domestic and international customers.

Jasbir Singh Gujral, Managing Director, Syrma SGS Technology, highlighted that the integrated SMT, THT and box-build capabilities will help address complex electronics manufacturing requirements across critical industries.

The new facility reinforces the India–Italy industrial collaboration and provides the joint venture with a platform to expand engineering, manufacturing and high-reliability electronics capabilities while supporting India’s growing role in global electronics supply chains.
