Technology and Elemaster Group, leading players in electronics manufacturing and semiconductor respectively in India and Europe, through their joint venture Syрма SGS Ltd, inaugurated the new state-of-the-art high-reliability electronics manufacturing facility in Bengaluru, Karnataka.

s, particularly in sectors where quality, reliability and stringent manufacturing critical.

is attended by Dr. Giandomenico Milano, Consul General of Italy in Bengaluru, along o teams from Syrma SGS and Elemaster, customers and other key stakeholders. His e inauguration underscored the growing importance of India-Italy industrial and llaboration and the strategic relevance of the partnership between the two

Bommasandra Industrial Area, the 20,000 sq. ft. facility is equipped with advanced : Technology (SMT), Through-Hole Technology (THT) and box-build assembly lines. s been established to address the growing demand for high-reliability electronics : including railways and transportation, industrial electronics, energy and medical hile enabling the joint venture to support global OEMs with high-quality g in India.

ire brings together the complementary strengths of Syrma SGS and Elemaster. ntributes its scaled manufacturing capabilities, established supply-chain d cost-efficient execution in India, while Elemaster brings decades of expertise in igh and manufacturing, engineering capabilities and strong relationships with global OEMs. Together, the companies aim to create a competitive platform for electronics manufacturing and expand opportunities for global customers from

liati, CEO, Elemaster S.p.a said: "We are delighted to inaugurate the Syrma SGS ility in Bengaluru and take this strategic partnership into its next phase. India important and growing market for Elemaster and for our global customers, and this s a strong foundation to support that opportunity.

Elemaster's engineering, technology and high-reliability manufacturing expertise S's scale and strong presence in India, we can create an effective platform for xisting and new customers. We see significant long-term potential in India and are ld this journey together with Syrma SGS."

hip brings together Syrma SGS's manufacturing scale and execution capabilities
 's engineering expertise and strong relationships with global OEMs. As global
 evolve, India has a significant opportunity to move beyond scale and build
 areas where reliability, quality and engineering depth are critical. Through this joint
 e creating a platform that can serve both Indian and international customers while
 o the broader 'Make in India' ambition."

ujral, MD, Syrma SGS Technology, added: "The new facility represents an important
 r manufacturing footprint and strengthens our ability to serve customers in high-
 nents. With SMT, THT and box-build capabilities under one roof, the facility provides
 platform to support complex electronics manufacturing requirements across
 strial and medical applications.

ularly pleased with the progress of our partnership with Elemaster, and the
 combine our manufacturing strengths with its technology and engineering
 e believe this will enable us to deliver greater value to customers while building
 int manufacturing capabilities from India."

ion program featured institutional addresses and a dedicated address on the joint
 oy Valentina Cogliati, CEO, Elemaster Group, followed by a tree plantation
 official unveiling of the facility and guided visits of the plant and shop floor.

y marks another step in the evolution of India's electronics manufacturing
 rticularly in high-reliability applications where engineering expertise, process
 / and stringent manufacturing standards are essential. It is expected to provide the
 ith a platform to serve both domestic and international customers and support the
 ation of India into global electronics supply chains.

S Elemaster partnership also reinforces the broader India-Italy industrial
 / bringing together complementary capabilities from the two countries. With the
 e joint venture aims to build an integrated platform spanning engineering,
 g and high-reliability electronics, while creating globally competitive, Made-in-
 for customers across critical end-markets.
