SHARE

Syrma SGS Technology and **Elemaster Group** have inaugurated a new high-reliability electronics manufacturing facility in Bengaluru, Karnataka. The

companies operate the facility through their joint venture, Syrma SGS Elemaster Private Ltd. The inauguration marks a key milestone in the joint venture's efforts to expand advanced electronics manufacturing capabilities in India.

New facility targets high-reliability electronics demand

The facility will serve domestic and global customers, particularly across industries requiring quality, reliability and stringent manufacturing standards. The 20,000 sq. ft. facility sits in the Bommasandra Industrial Area and features advanced manufacturing technologies. It includes Surface Mount Technology (SMT), Through-Hole Technology (THT) and box-build assembly lines. The facility will address rising demand for high-reliability electronics across several critical sectors.

These sectors include railways and transportation, industrial electronics, energy and medical electronics. The joint venture will also use the facility to support global OEMs with high-quality manufacturing from India.

Manufacturing and engineering strengths

Syrma SGS contributes manufacturing scale, a strong supply-chain ecosystem and cost-efficient execution in India. Elemaster brings decades of expertise in electronic design, manufacturing and engineering capabilities. The company also contributes strong relationships with European and global OEMs.

Together, the partners aim to build a competitive platform for high-reliability electronics manufacturing. The joint venture will also create new opportunities for global customers through its India-based manufacturing capabilities.

India–Italy collaboration gains strategic importance

Dr. Giandomenico Milano, Consul General of Italy in Bengaluru, attended the inauguration alongside company leaders and key stakeholders. His presence highlighted the growing importance of India–Italy industrial and technology collaboration.

Valentina Cogliati, CEO, Elemaster S.p.a said, “We are delighted to inaugurate the Syrma SGS Elemaster facility in Bengaluru and take this strategic partnership into its next phase. India represents an important and growing market for Elemaster and for our global customers, and this facility provides a strong foundation to support that opportunity. By combining Elemaster’s engineering, technology and high-reliability manufacturing expertise with Syrma SGS’s scale and strong presence in India, we can create an effective platform for serving both existing and new customers. We see significant long-term potential in India and are pleased to build this journey together with Syrma SGS.”

Sandeep Tandon, Executive Chairman, Syrma SGS Technology Ltd., said, “The inauguration of the Syrma SGS Elemaster facility is an important milestone in our vision of building India into a globally competitive hub for high-reliability electronics manufacturing. This partnership brings together Syrma SGS’s manufacturing scale and execution capabilities with Elemaster’s engineering expertise and strong relationships with global OEMs. As global supply chains evolve, India has a significant opportunity to move beyond scale and build capabilities in areas where reliability, quality and engineering depth are critical. Through this joint venture, we are creating a platform that can serve both Indian and international customers while contributing to the broader ‘Make in India’ ambition.”

Jasbir Singh Gujral, Managing Director, Syrma SGS Technology Ltd., said, “The new facility represents an important addition to our manufacturing footprint and strengthens our ability to serve customers in high-reliability segments. With SMT, THT and box-build capabilities under one roof, the facility provides an integrated platform to support complex electronics manufacturing requirements across railways, industrial and medical applications. We are particularly pleased with the progress of our partnership with Elemaster and the opportunity to combine our manufacturing strengths with its technology and engineering capabilities.

We believe this will enable us to deliver greater value to customers while building globally relevant manufacturing capabilities from India.”

Facility supports electronics manufacturing ecosystem

The inauguration programme included institutional addresses, a tree plantation ceremony and the official unveiling of the facility. Stakeholders also toured the plant and its shop floor during the event. The new facility strengthens India’s electronics manufacturing ecosystem and supports critical applications requiring advanced engineering and stringent quality standards. The Syrma SGS Elemaster partnership also reinforces industrial ties between India and Italy. The joint venture aims to develop globally competitive, Made-in-India electronics solutions for customers across critical end-markets.
