Syrma SGS Elemaster Inaugurates New Bengaluru Manufacturing Facility

Bengaluru, India – Syrma SGS Technology and Elemaster Group, leading players in electronics manufacturing and design ecosystem respectively in India and Europe, through their joint venture Syrma SGS Elemaster Pvt Ltd inaugurated the new state-of-the-art high-reliability electronics manufacturing facility in Bengaluru, Karnataka.

The inauguration marks a significant milestone in the joint venture's efforts to build advanced electronics manufacturing capabilities in India and support customers across domestic and global markets, particularly in sectors where quality, reliability, and stringent manufacturing standards are critical.

The launch was attended by Dr Giandomenico Milano, Consul General of Italy in Bengaluru, along with leadership teams from Syrma SGS and Elemaster, customers, and other key stakeholders. His presence at the inauguration underscored the growing importance of India–Italy industrial and technology collaboration and the strategic relevance of the partnership between the two companies.

Located in the Bommasandra Industrial Area, the 20,000 sqft facility is equipped with advanced Surface Mount Technology (SMT), Through-Hole Technology (THT), and box-build assembly lines. The facility has been established to address the growing demand for high-reliability electronics across sectors including railways & transportation, industrial electronics, energy, and medical electronics, while enabling the joint venture to support global OEMs with high-quality manufacturing in India.

The joint venture brings together the complementary strengths of Syrma SGS and Elemaster. Syrma SGS contributes its scaled manufacturing capabilities, established supply-chain ecosystem and cost-efficient execution in India, while Elemaster brings decades of expertise in electronic design and manufacturing, engineering capabilities, and strong relationships with European and global OEMs. Together, the companies aim to create a competitive platform for high-reliability electronics manufacturing and expand opportunities for global customers from India.

Valentina Cogliati, CEO, Elemaster Spa, said, "We are delighted to inaugurate the Syrma SGS Elemaster facility in Bengaluru and take this strategic partnership into its next phase. India represents an important and growing market for Elemaster and for our global customers, and this facility provides a strong foundation to support that opportunity. By combining Elemaster's engineering, technology, and high-reliability manufacturing expertise with Syrma SGS's scale and strong presence in India, we can create an effective platform for serving both existing and new customers. We see significant long-term potential in India and are pleased to build this journey together with Syrma SGS."

Sandeep Tandon, Executive Chairman, Syrma SGS Technology Ltd, stated, "The inauguration of the Syrma SGS Elemaster facility is an important milestone in our vision of building India into a globally competitive hub for high-reliability electronics manufacturing. This partnership brings together Syrma SGS's manufacturing scale and execution capabilities with Elemaster's engineering expertise and strong relationships with global OEMs. As global supply chains evolve, India has a significant opportunity to move beyond scale and build capabilities in areas where reliability, quality, and engineering depth are critical. Through this joint venture, we are creating a platform that can serve both Indian and international customers while contributing to the broader 'Make in India' ambition."

Jasbir Singh Gujral, Managing Director, Syrma SGS Technology Ltd, commented, "The new facility represents an important addition to our manufacturing footprint and strengthens our ability to serve customers in high-reliability segments. With SMT, THT and box-build capabilities under one roof, the facility provides an integrated platform to support complex electronics manufacturing requirements across railways, industrial, and medical applications. We are particularly pleased with the progress of our partnership with Elemaster and the opportunity to combine our manufacturing strengths with its technology and engineering capabilities. We believe this will enable us to deliver greater value to customers while building globally relevant manufacturing capabilities from India."

The inauguration program featured institutional addresses and a dedicated address on the joint venture plant by Elemaster Group CEO Cogliati, followed by a tree plantation ceremony, the official unveiling of the facility and guided visits of the plant and shop floor.

The new facility marks another step in the evolution of India's electronics manufacturing ecosystem, particularly in high-reliability applications where engineering expertise, process control, quality, and stringent manufacturing standards are essential. It is expected to provide the joint venture with a platform to serve both domestic and international customers and support the growing integration of India into global electronics supply chains.

The Syrma SGS Elemaster partnership also reinforces the broader India–Italy industrial relationship by bringing together complementary capabilities from the two countries. With the new facility, the joint venture aims to build an integrated platform spanning engineering, manufacturing, and high-reliability electronics, while creating globally competitive, Made-in-India solutions for customers across critical end-markets.
